

Environmental Protection Code for Suppliers and Service Providers

As ISO 9001, 14001, 27001, 45001 and 50001 certified Company CPO Containerschiffreederei (GmbH&Co.) KG (hereinafter-called CCPO) we are committed to conducting our business activities in full compliance with applicable laws, rules and regulations and strive for continual improvements of our social, energy and environmental performance throughout our entire value chain.

This Environmental Protection Code for Suppliers and Service Providers (hereinafter called Code) defines our basic requirements in respect of the environment and energy performance. We expect our suppliers and service providers to realize the principles described in this code in their own business or have at least equivalent standards adopted and conduct their business in accordance therewith.

We will continuously monitor suppliers' and service providers' compliance with the standards set out in this code by asking suppliers and service providers relevant information and by performing supplier audits and/or self-assessments. Suppliers and service providers are strongly urged to familiarize themselves with this code to ensure successful working relations with CCPO. This code shall apply to all suppliers, sub-contractors and to other entities acting on behalf of them.

Waste reduction:

- Implementation of a systematic approach to identify, manage, reduce and responsibly dispose all kinds of waste. This includes modifying production, maintenance and facility processes, materials substitution, recycling and re-using materials.
- Taking back any packaging materials of the goods in full or in parts at the place of delivery free of charge for professional disposal, if possible.
- Characterization, monitoring, control and handling of wastewater and solid waste generated from operations, industrial processes and sanitation facilities prior to discharge or disposal.
- Lean, efficient, error-free processes and noticeable less paper consumption due to intelligent e-business solutions.

Hazardous Substances:

- Use and installation of asbestos-containing substances in any assembly, sub-assembly of supplied goods or services is prohibited as defined by the IMO in relevant regulations. An asbestos-free declaration must be added in the delivery note.
- Implementing and comply with the EUSRR and Hong Kong Convention and provide required documentation with deliveries of supplies and services

Energy Efficiency / Air Emissions:

- Implementation of a systematic approach to identify and reduce energy consumption and emission.
- Safe, energy efficient and cost-effective transport fleet in terms of fuel consumption and greenhouse gas reduction.
- Improvement of energy performance by optimization of delivery and service network as well as delivery quantities and type of transportation. The centralization of stocks minimizes transport distance and time.
- Characterization, monitoring, control and handling of air emissions of volatile organic chemicals, aerosols, corrosives, particulates, ozone depleting chemicals and combustion by-products generated from operations prior to emitting, discharge or disposal.

General:

- Preference granted to the certified logistics providers with environmental friendly corporate principles acc. ISO 14001 and ISO 50001.
- Observance of environmental aspects within CCPO's Terms and Conditions
- Undertaking reasonable efforts to encourage your own suppliers and sub-contractors to comply with the principles of this code.
- CCPO reserves the right to audit compliance with this code. In case of any non-compliance suppliers and service providers shall act promptly to correct the situation to CCPO's satisfaction.

Environmental protection concerns all of us!
